

**Piles of rocks: What do they have in common?**

Examine the trays of rocks in front of you. Each of these rocks have something in common or they represent a 'story' of what can happen to rocks. Choose **FOUR (4)** of the rocks which interest you and in each of the cells bellow: Draw an accurate sketch of the rock, including: (1) dimensions in Cm. (2) any interesting features (3) Colored pencils to capture the different colors you see (4) your 'best guess' as to how this rock may have formed (leave blank if you have **NO** idea). (5) The **NAME** of the rock type (if possible).

**What do these rocks have in common? Is there a story here?**
